

HostMyCalls provides an easy to use and manage text messaging service (SMS) for businesses

Why text messaging for business? It is found just 20% of emails communicating information to consumers are ever opened. It has become even harder to maintain the attention of your audience. It's believed that 90% of text messages are read versus just 20% of emails. Text messaging gives you a much better opportunity to get important information into the hands of your target audience.

Business text messaging is what many companies and organizations have found to be one of the most successful ways of directly communicating with their customers, employees or members or prospects.

The SMS HostMyCalls Text Messaging Service is affordable, flexible, and simple to use!

Our new *Version 2 Platform* is more powerful, efficient, and secure. It provides a better user experience and the release of a new feature package which provides many additional feature enhancements.

It's web portal provides an enhanced user experience with very user-friendly web pages. Some added features include full screen toggle control and easy to navigate sidebar menu and useful message management features.

New Features include in Feature Package 1 of the Version 2 platform*

Enhanced Contact List – Importing, multiple lists, multiple numbers per contact

Opt-Out – Allows recipients to STOP and START messaging to them

Message Forward - Allows assigned numbers to be forwarded to another text enabled number

Block – Allows users to block incoming number that are found to be unwanted

HIPAA compliance – Fully HIPAA compliant

Audible Notification Control – New audible message notification

Immediate Email Notification - Sends email when a new message arrived

Message Delivery Status – Provides user delivery status on all sent messages

Group Message Naming – Add custom name to group messages

**These are just some of the features in the first release of the version 2 platform. They are in addition to the existing list in the version 1 platform.*

In addition to the basic text messaging to and from separate people, you can send reminders for meetings, appointments, or service announcements to groups of people using easy to create lists and templates.

Share or distribute HMC SMS roles among your staff for multiple business numbers and multiple users. Users and numbers are simple to manage for your business.

Send SMS texts with up to 2500 characters, emojis and MMS texts with images to individual or groups of people in many supported languages.

If routine groups need to be notified often or for special purposes, use the bulk messaging feature as a convenient method for notification.

Our robust list of features overshadows our competitors and is surprisingly affordable!
